

CCR SLOT

Continuous Identification
Card Reader

The **CCR SLOT** is an identification card reader designed for industrial environments with **continuous card reading**.

It is mainly used in systems that record employee presence at specific workstations.

Once a card is inserted into the reader, the **reading process starts and repeats periodically as long as the card remains inside**. When the card is removed, the reader reports this event to the superior system.

TECHNICAL SPECIFICATIONS

Supply voltage	24 Vdc + 15 %
Current consumption	Typical 70 mA Maximum 100 mA
Wall contact	Yes
Supported cards	MIFARE, MIFARE Plus, DESFire, Proximity, HID
Number of slots	1
Optical indication	2 LEDs (red and green)
Protection class	IP42
Dimensions	138 x 110 x 47 mm
Weight	550 g
Color	Black
Addressing	1 to 15

FEATURES

- > Continuous identification card reading
- > Supports MIFARE, MIFARE Plus, DESFire, Proximity, HID
- > Detection of card removal from device
- > Robust mechanical design
- > Status indication by LEDs

Product Code:

- 252840** MIFARE/DESFire 13,56 MHz
252830 Proximity 125 kHz
