

CLP3208

LED Display Panel

The **CLP3208** (Contal LED Panel) is a simple device for displaying information.

In catering systems, it is used to display meal names during food distribution.

In attendance systems, **CLP3208** can serve as a precise time indicator. The LED panel is connected to the CCU (Central Control Unit) via RS485.

TECHNICAL SPECIFICATIONS

Supply voltage	24 Vdc + 15 %
Current consumption	Typical 200 mA Maximum 500 mA
Communication	RS485
Number of displayed characters	6
Outputs	1 relay output
Protection class	IP41
Dimensions	400 x 110 x 25 mm
Weight	1 250 g
Color	Black
Addressing	1 to 15

FEATURES

- > Durable device
- > Clear information display
- > Relay output
- > Multi-purpose use

Product Code:
25270060
