

UPS27/300

Intelligent Backup Power Supply

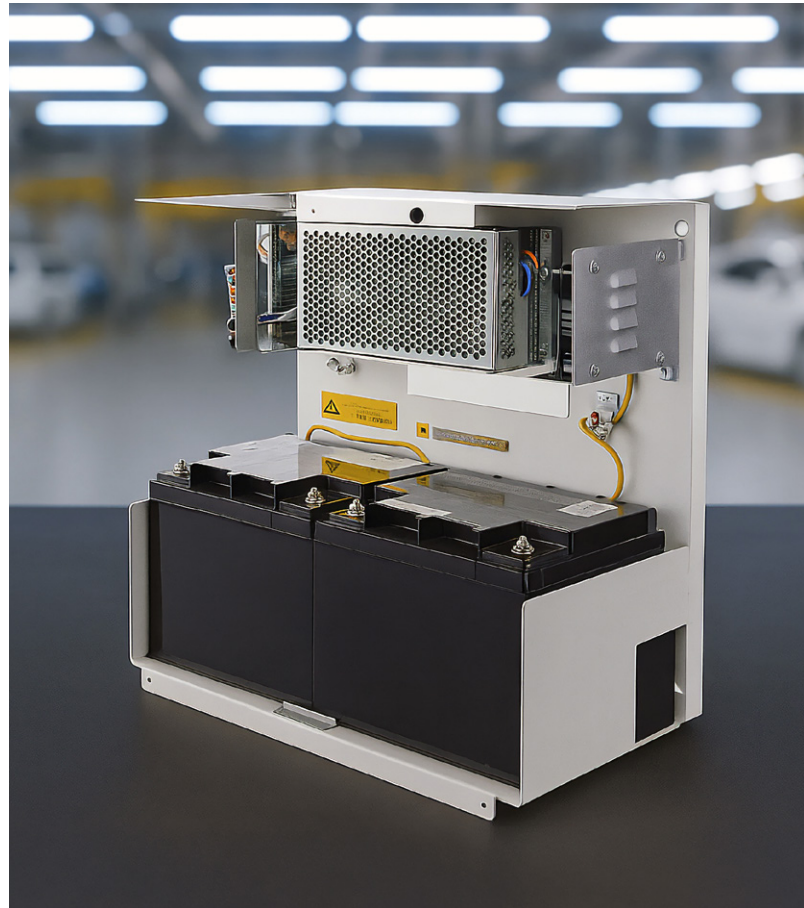

UPS27/300 is an intelligent DC backup power supply. It is used in solutions where high device availability is required and potential power outages are not mitigated by other means.

It is suitable for powering devices with a nominal input voltage of 24 VDC and provides **monitoring functions**, including primary power supply, output voltage, battery connection and charge status, and device temperature.

The UPS27/300 power supply is used for powering Contal devices. It is suitable for industrial environments, with configurable backup battery capacity from 40 to 80 Ah.

TECHNICKÉ ÚDAJE

Supply voltage	230 Vac
Current consumption	Typical 50 mA Maximum 100 mA
Wall contact	Yes
Communication	Ethernet 10/100 Mbps
Optical indication	LEDs
Acoustic indication	Built-in buzzer
Protection class	IP41
Dimensions	400 x 420 x 200 mm
Weight	30 kg with batteries
Color	Grey RAL7035

VLASTNOSTI

- > Detailed device status monitoring
- > Integration with Contal Nova system
- > Status indication via LEDs
- > Acoustic indication of primary power failure

Product Code:
25300020
